

Recent Municipal Aggregation Questions

I have solar panels/I am a net-metering customer, should I participate?

No. The program does not work well with on-site solar. Residents with solar panels at their home should not participate in the program. Residents with solar panels may receive an opt-in letter, but they are not automatically enrolled.

Net metering customers may forfeit credits for electric supply service and delivery service, or both, if they switch suppliers. It is recommended net metering customers carefully consider remaining with their current supplier.

Customers have several opportunities to opt out of the program:

As the Town's chosen electrical supplier, Constellation NewEnergy, Inc, will send by mail eligible customers the opt-out letter offering the opportunity to opt out of the Aggregation program at no charge. Opt-out notices will be sent to eligible participants before the program begins in July. Opt-out letters must be returned by May 7 to ensure residents are removed before the program starts.

Residents can opt out from now through May 2026. However, it may take one or two billing cycles to remove them from the program if they miss the May 7 deadline.

Ameren Rates:

We will not know the new summer and non-summer rates from Ameren until May 15th 2025. They are filed with the Illinois Commerce commission by this date. The rates that are included in the letter are based on the current rates that are published by the Illinois Commerce Commission on pluginillinois.gov link. We have been told by several suppliers they expect the Ameren rate to be over \$0.11/kWh when the new rates come out.

I have opted out of a previous program

If a resident has opted out before they will need to do so again. Each time there is a contract with an updated price and term it requires a new opt out. The opt out is only for the current offering not to opt out all together.
